SUMMARY

Full Stack Developer specialising in the MERN stack with hands-on experience building production-grade web applications and AI/ML systems using Next.js, TypeScript, and Python. Proven track record delivering end-to-end features — from MongoDB schema design and REST APIs to accessible, performant frontends — with a focus on NLP and computer vision for multilingual contexts.

EDUCATION

University of Engineering & Technology, Lahore

Bachelor of Science in Computer Science

Sep 2022 – Jun 2026

Lahore, Pakistan

EXPERIENCE

Smart District Narowal

Feb 2026 – Jun 2026

Web Developer Intern

Narowal, Pakistan

- Architected and deployed MERNShop, a production-grade e-commerce frontend shipping 12 products across 5 categories using Next.js 15, React 19, TypeScript, and Tailwind CSS — as part of the district's smart city digital commerce initiative.
- Delivered 8+ features end-to-end across 2 roles (admin/user): role-based authentication, server actions, Framer Motion transitions, dark mode, and an admin dashboard with Recharts analytics and TanStack Table — deployed live on Vercel with CI/CD via GitHub Actions.
- Integrated a Node.js/Express.js backend with MongoDB, REST APIs, and e-governance data pipelines supporting district-level digital services.

Inter Services Public Relations (ISPR)

Jan 2026 – Feb 2026

Communications Intern

Lahore, Pakistan

- Coordinated digital communications and content workflows at Pakistan's official tri-service military PR body, which serves as the principal media interface for the Army, Air Force, and Navy.
- Facilitated public relations operations under the Director General, ISPR, gaining institutional exposure to national-level strategic communications and information management.

PROJECTS

SkillSeal — AI Skill Verification Platform | React | Node.js | TypeScript | MongoDB | Redis | [Live Demo](#)

- Built a full-stack skill-verification platform with a Google Gemini-powered verifier engine that assesses and certifies user competencies, paired with an adaptive recruiter dashboard for candidate discovery and filtering.
- Engineered real-time messaging with Socket.io, Payoneer payment integration, and silent JWT token-refresh authentication — deployed as a monorepo with a React/Vite frontend on Vercel and a Node/Express/TypeScript backend on Render, backed by MongoDB and Redis on a custom domain.

MERNShop — E-Commerce Platform | Next.js 15 | React 19 | TypeScript | Zustand | [Live Demo](#)

- Built a production e-commerce platform managing 12 products across 5 categories with 2-role access control (admin/user), admin dashboard featuring Recharts analytics, TanStack Table, and a cmdk command palette.
- Shipped 8+ features end-to-end — Framer Motion transitions, dark mode, Zod + React Hook Form validation, TanStack Query data fetching, and Server Actions — deployed on Vercel with CI/CD via GitHub Actions.

EarlyWrite — Dysgraphia Detection | Next.js | React | TypeScript | MongoDB | [Live Demo](#)

- Built the full-stack web platform for a bilingual dysgraphia screening system targeting English and Urdu handwriting, integrating a machine learning backend (TensorFlow/EfficientNet-B0) developed by the research team into a responsive Next.js frontend with MongoDB-backed diagnostic report storage.
- Designed the end-to-end user flow for handwriting sample submission and real-time diagnostic reporting, achieving a 30-second result turnaround; the underlying ML model reached 84.30% accuracy and 0.90 ROC-AUC across 2,576 clinically-labelled samples.

TECHNICAL SKILLS

Languages: JavaScript (ES2024), TypeScript

Frontend: Next.js 15, React 19, Tailwind CSS, Shadcn/ui, Framer Motion, Zustand, TanStack Query, TanStack Table, Zod, React Hook Form, Recharts, cmdk

Backend: Node.js, Express.js, REST APIs, Server Actions, JWT Authentication, Role-Based Access Control, Socket.io, Payoneer

Databases: MongoDB, Mongoose ODM, Redis

DevOps & Tools: Git, GitHub, Vercel, Render, GitHub Actions (CI/CD), Postman, VS Code
